  delete from TransactionDetailTemp
where TransactionMasterTempId = 6

now i want new functionality in this
after add the sales orderit comes to
index coreectin the index per rows
edit delete button is there right i
want extra button PO once i click poit
opens the same formlike in editbut i
want different controllerwhile clik
POin thisonce i click saveit saves the
data in the transaction master and the
transaction detailin this i want the
crud opertion as it isbut the regstrid
for this is 2and the and the tranno is
based on the regstrid soit comes 1 2
etc based on the tranno the trandno is
generatedand the tranpcount is default
zeroin the transaction masterso once i
click save buttonfor click the po
buttonin the rowthat tranmidis saved
to the newly saved po formtransaction
master column TRANLMID is saved the
tranmid of the row having po buttonfor
preventing duplicationonce it donewe
dont delete or edit the sales order
index rowlike this in the transaction
detail i hyave an column TRANDAID it
saves the newly entered po valuesaves
the trandid in thisplease make this
```
